

CINE TANK: GENESIS

INNOVATE, IDEATE, INSPIRE

Event Overview

- Number of Participants: 3 participants per team.
- Core Concept: A two-part event where teams introduce a tech product or brand through a short cinematic film, immediately followed by a live pitch built upon that film.
- Theme: Tech-based product, or service.

Phases of the Event

Phase	Duration	Description
1. Cinematic Film Screening	2 Minutes	Teams screen a short cinematic film introducing their tech product or brand to the judges.
2. Live Pitch	3.0 Minutes	Teams conduct a live pitch of the same product, anchored by the film just screened.

General Guidelines

- Narrative Continuity: The pitch must be built around and anchored by the film. The film is the core foundation.
- Film: Must be made before the event.
- Presentation Flow: The 2-minute film screens for the judges and is immediately followed by the 3-minute live pitch.
- Product Focus: Both the film and the pitch must focus on the same tech product or brand.

Allowed

- Use of AI tools for producing and editing the cinematic film.
- Creative, narrative-driven filmmaking styles that feel like a short film.
- Introduction of original tech products or brands.

Not Allowed

- Making the film feel like a traditional advertisement or commercial (it must be cinematic).
- Standard "Shark Tank" style pitches that ignore the narrative established in the film.
- Exceeding the time limits (2 minutes for film, 3 minutes for pitch).
- Participating with fewer or more than 3 members per team.
