

CODE CLASH

GENESIS
INNOVATE, IDEATE, INSPIRE

1. Contest Overview

- Platform: HackerRank
- Participants: 2 per team
- Duration: 120 Minutes.
- Allowed Languages: Any programming language currently supported by HackerRank (e.g., C++, Java, Python 3, C#, etc.) is allowed, unless explicitly stated otherwise beforehand in a specific problem statement.

2. Contest Format & Scoring

The event will follow standard competitive programming formats widely used on HackerRank for senior-level algorithmic competitions:

- Problem Structure: The contest will feature a set of algorithmic and logical problem-solving challenges ranging in difficulty (typically 4 to 6 problems from Easy to Hard).
- Scoring Mechanism: Points are awarded based on the number of hidden test cases your code successfully passes.
- Partial Points: Suboptimal solutions (e.g., brute-force approaches) that pass a subset of the test cases or pass within broader time complexities will receive partial credit.
- Tie-Breaker: In the event of a tie in total points, HackerRank's standard time-penalty system will be applied. The participant who reached the score in the least cumulative time will be ranked higher.

3. Network & Device Policies

To ensure a fair and controlled environment, the following infrastructure rules apply:

- Network Requirement: The official School Wi-Fi will be used by all participants for the duration of the event.
- AI Restriction: AI tools (such as ChatGPT, GitHub Copilot, Gemini, Claude, etc.) will be strictly blocked on the network. Any attempt to bypass these restrictions will result in disqualification.
- Device Rules: Participants are permitted to have multiple devices at their workstation (for example, a secondary screen or tablet for rough work/reading). However, only one device will be considered for submissions.
- Primary Device Constraint: The same primary device must be used to make all HackerRank submissions throughout the 120-minute window. Switching submission devices mid-contest is not allowed and will be flagged.

4. Code of Conduct & Integrity

- Zero Tolerance Policy: No unfair means of any kind are allowed.
- No Communication: No communication—verbal, written, or digital—is allowed among participants or with anyone outside the contest room during the 120-minute window.
- Plagiarism Detection: Submitting duplicated code from the internet or another participant's screen will result in a score of zero and immediate disqualification.

5. Pre-Contest Checklist

- Ensure you have a registered and active HackerRank account.
- Connect your primary submission device to the designated School Wi-Fi before the timer starts.
- Ensure your device is fully charged
 - Have pen and blank paper ready for dry-running your code and algorithms.
